

amstrad cpc6128

widely considered by the cognescenti to be technically one of the best-designed machines of the 8-bit era, the amstrad cpc6128 continues to delight, with one of the more boisterous and adventurous contemporary developer communities to be found in the retro-revival scene.

here we present an upgraded system, capable of using USB storage - and for the fun of it, we've filled the stick with all of the submitted entries in the CPC RetroDev competition for 2018.

have fun!

demo

turn the machine on, select the disk image to be loaded using the knob, and then mount the image by pressing the knob. use CAT and RUN" commands to get started.

exhibit period

this system will be on display from April - May 2019

CPC RetroDev 2018
